

Internet Governance

Internet Governance

- **Very complex ecosystems**
- **Mainly driven by not-for-profit private associations**
- **ICANN, RIRs, ISOC, IETF**
- **Bottom-up process**
- **Transparent**
- **Multistakeholder approach**

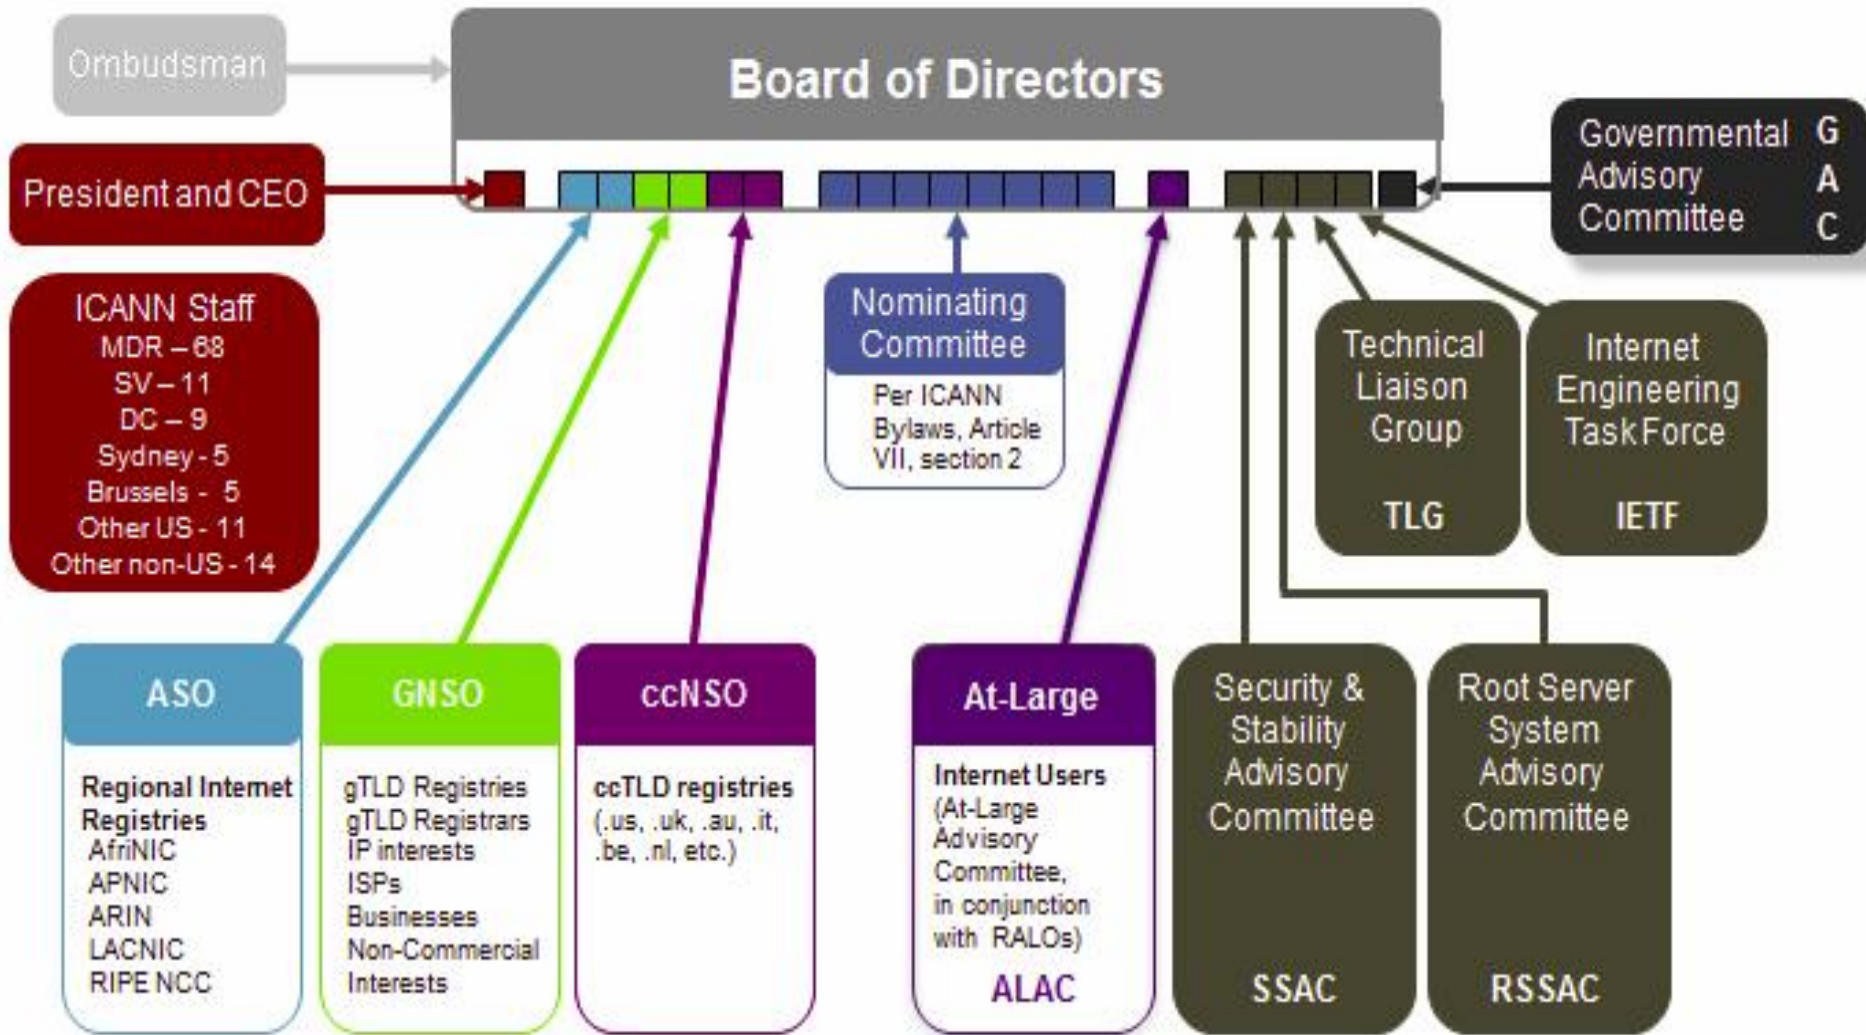

ICANN

- **Founded in 1998**
- **Neutral, transparent body**
- **Mature**
- **Technical innovations – IDN, newgTLDs**
- **Joint Project Agreement → Affirmation of Commitment → IANA Transition**
- **No major issues**

ICANN Multi-Stakeholder Model

ICANN and GAC

- **Key role of GAC at ICANN**
- **Government of Czech Republic active at Government Advisory Committee – Ministry of Industry and Trade**
- **No need for revolutionar revision**
- **Don't fix what's not broken!**
- **GAC and voting seat at ICANN board?**

IANA Transition

- **Privatization of the Internet – process since 1998**
- **CTU welcomes NTIA's decision**
- **(Multi)governmental body is not the answer!**
- **Multistakeholder model should be kept**
- **ICANN working on the new model**

Thank you for your attention
